VOL. XV, 1966

METABOLISM

Clinical and Experimental

CONTENTS

No. 1 (January)

Preliminary Report

- Changes in the Nitrogen Metabolism in Obese Women after Fasting
and Refeeding *R. Rath and J. Masek* 1
- The Effect of Prolonged Cold and Starvation and Subsequent Refeeding
on Plasma Lipids and Glucose of Normal Men
M. Mager and P. F. Iampietro 9
- Defect of Urinary Acidification during Fasting
F. X. Schloeder and B. J. Stinebaugh 17
- Postabsorptive Serum Triglyceride Levels in Man after the Addition of
Highly Unsaturated Fish Oils to the Diet *H. Engelberg* 26
- The Effects of Caffeine, DNA and Insulin on the Metabolism of Glucose
by Adipose Tissue in Vitro
J. Anderson, G. Hollifield and J. A. Owen, Jr. 30
- Dynamics of Development of the Metabolic and Compositional Altera-
tions of Depot Fat in Hypothalamic Obese Rats
S. E. Starr, J. D. Crawford and H. A. Haessler 39
- Excretion of Amino Acids by Patients with Psoriasis Ingesting Two
Levels of the Same Protein. *W. D. Block and M. H. Westhoff* 46
- The Role of Aldosterone and Vasopressin in the Postural Changes in
Renal Excretion in Normal Subjects and Patients with Idiopathic
Edema. *D. H. P. Streeten and P. J. Speller* 53
- Plasma NEFA Response to a Glucose Load in Patients with Diabetes,
Arteriosclerosis and Obesity
L. G. De Caro, A. Fattorini and M. Gorini 65
- Studies Using the Intraperitoneal Assay on the State of Insulin in Rat
Serum. *J. Partamian, E. Rasio and G. F. Cahill, Jr.* 70
- Influence of Posture and Diurnal Rhythm on the Renal Excretion of
Acid: Observations in Normal and Adrenalectomized Subjects
P. R. Steinmetz and R. P. Eisinger 76
- The Effect of Diazoxide and Chlorothiazide on Glucose Uptake in Vitro
C. A. Barnett and J. E. Whitney 88
- Book Review 94

No. 2 (February)

Preliminary Report

| | | |
|---|--|-----|
| Effect of Sheep Growth Hormone on Plasma Insulin Concentration in Sheep..... | A. L. C. Wallace and J. M. Bassett | 95 |
| The Beneficial Effect of Intermittent Total Fasts on the Glucose Tolerance in Obese Diabetic Patients | G. L. Schless and G. G. Duncan | 98 |
| The Effect of Frozen Storage on Serum Insulin-Like Activity | L. Power, G. C. de l'Hortet and J. Conn | 103 |
| The Relation between Postheparin Lipolytic Activity and Plasma Triglyceride in Myxedema | D. Porte, Jr., D. D. O'Hara and R. H. Williams | 107 |
| Effect of Glucagon on Serum Insulin, Plasma Glucose and FFA in Man | P. M. Crockford, D. Porte, Jr., F. C. Wood, Jr. and R. H. Williams | 114 |
| The Effect of Diet and Thyroxin on Plasma Lipids in Myxedema | D. D. O'Hara, D. Porte, Jr. and R. H. Williams | 123 |
| Overweight and Triglyceride Level in Normal Persons and Patients with Diabetes Mellitus.. | S. Sailer, F. Sandhofer and H. Braunsteiner | 135 |
| Studies on Electrolyte Metabolism in Idiopathic and Thyrotoxic Periodic Paralysis. | | |
| I. Arteriovenous Differences of Electrolytes during Induced Paralysis..... | K. Shizume et al. | 138 |
| II. Total Exchangeable Sodium and Potassium.. | K. Shizume et al. | 145 |
| III. Intra- and Extracellular Concentrations of Potassium and Sodium in Muscle and Their Changes during Induced Attacks of Paralysis..... | Y. Shishiba et al. | 153 |
| Insulin Levels in Monkey Plasma Determined by Immunoassay | F. E. Wherry, R. E. Miller and J. W. Mason | 163 |
| The Effect of Feeding Patterns on Fat Deposition in Mice | A. Kekwick and G. L. S. Pawan | 173 |
| The Effect of Pituitary and Thyroid Hormones on Bile Acid Metabolism in the Rat..... | W. T. Beher, M. E. Beher and G. Semenuk | 181 |
| Book Review | | 189 |

No. 3 (March)

Preliminary Report

| | | |
|--|--|-----|
| The Effect of Beta-Hydroxybutyric Acid on Glycerol Outflow from Adipose Tissue in Vitro..... | P. Björntorp | 191 |
| Serum Growth Hormone and Energy Supply in Fasting Obese Patients | F. Schwarz, H. G. van Riet and W. Schopman | 194 |
| The One Hour Response to Parathyroid Extract in Hyperparathyroidism and Renal Disease..... | H. Gershberg, S. Mari and H. St. Paul | 206 |
| A Study of Gluconeogenesis by the Administration of 2-Deoxyglucose I. and II..... | N. Friedmann and H. E. Wertheimer | 222 |

| | |
|--|-----|
| The Response of Bone to Metabolic Acidosis in Man | |
| <i>M. M. Reidenberg, B. L. Haag, B. J. Channick, C. R. Shuman</i> | |
| <i>and T. G. G. Wilson</i> | 236 |
| Malignant Interstitial-Cell Tumor of the Testis Treated with o,p'-DDD | |
| <i>D. Abelson, H. Bulaschenko, P. R. Trommer and A. Valdes-Dapena</i> | 242 |
| The Effect of Diazoxide on Catecholamines | |
| <i>Z. Zarday, J. Viktora and F. Wolff</i> | 257 |
| Effects of Insulin and Diabetes on Flux Rates of Plasma Glucose and FFA..... | |
| <i>T. R. Csorba, I. Matsuda and N. Kalant</i> | 262 |
| Effect of Excess Iodide on Thyroid Hormone Synthesis in Hypophysectomized, Thyrotropin Administered Rats | |
| <i>S. Katakai, T. Yamada and K. Shichijo</i> | 271 |
| Liver RNA Polymerase Activity in Genetically Obese and Lean Rats Fed Cholesterol..... | |
| <i>L. C. Fillios and O. Yokono</i> | 279 |
| Book Review | 286 |

No. 4 (April)

| | |
|---|-----|
| Preliminary Report | |
| Radioimmunoassay for Human Luteinizing Hormone | |
| <i>W. D. Odell, G. T. Ross and P. L. Rayford</i> | 287 |
| Acromegala Pre- and Postpituitary Irradiation | |
| <i>G. P. Kozak, A. I. Vagnucci, D. P. Lauler and G. W. Thorn</i> | 290 |
| Hydrocortisone and/or Desiccated Thyroid in Physiologic Dosage. XVIII. Dexamethasone, Plasma Corticosteroids and Response to ACTH | |
| <i>T. S. Danowski, R. E. Cohn, N. R. Limalye, J. H. Sunder and C. Moses</i> | 304 |
| A Diabetogenic Polypeptide from Bovine Adenohypophysis Similar to that Excreted in Lipotrophic Diabetes | |
| <i>L. H. Louis, J. W. Conn and M. C. Minick</i> | 309 |
| Responses of Obese-Hyperglycemic Mice and Normal Mice to "Bound" and Crystalline Insulin | |
| <i>S. N. Gershoff, A. M. Huber and H. N. Antoniadis</i> | 325 |
| Studies on the Thyroidal Proteins | |
| <i>L. C. G. Lobo, J. Fridman, M. A. Rebello, F. Hargreaves and J. G. Figueiredo</i> | 330 |
| Intrinsic Renal Mechanisms for the Regulation of Body Electrolytes in Man..... | |
| <i>D. Baldwin, A. F. Nibbe and T. B. Schwartz</i> | 338 |
| Cortisol and Cortisone Excretion from Infancy to Adult Life | |
| <i>M. C. Minick</i> | 359 |
| Studies of Adrenocortical Function of Women with Hirsutism | |
| <i>R. D. Jacobs, J. Lobotsky, A. M. Moses, E. L. Klaiber and C. W. Lloyd</i> | 364 |
| The Regional Distribution of Se ⁷⁵ -Selenomethionine in the Rat | |
| <i>H. K. Awad, E. J. Potchen, S. J. Adelstein and J. B. Dealy, Jr.</i> | 370 |
| Letters to the Editor | 379 |

No. 5 (May)

| | | |
|---|---|-----|
| A Posthospitalization Study of Patients Treated for Obesity by a Total Fast Regimen..... | M. A. Hunscher | 383 |
| Effect of Prolonged Fasting on the Expired $C^{14}O_2$ from Palmitate and Glucose in Obese Subjects | R. E. Bolinger, M. E. Schafer and T. T. Kuske | 394 |
| Electrolyte and Lipid Metabolism of Lean Fasting Men and Women | W. L. Bloom, G. Azar and J. E. Clark | 401 |
| Changes in Heart Size and Plasma Volume during Fasting | W. L. Bloom, G. Azar and E. G. Smith, Jr. | 409 |
| Acid-Base Equilibria in Arterial Blood and Ascitic Fluid | A. Blumentals, A. Eichenholz and R. O. Mulhausen | 414 |
| Activity of Liver Tyrosine Aminotransferase upon 3-Iodotyrosine | G. Litwack | 420 |
| Amino Acid Metabolism in Patients with Hurler's Syndrome | O. M. Rennert and A. S. Dekaban | 429 |
| Estimation of Bone Mineral Transfer Rate by the Measurement of Long-Term Retention of SR^{85} | J. Shimmins and D. A. Smith | 436 |
| The Influence of Overeating on the Endocrine Testis Function in Mice | C. Lidell and B. Hellman | 444 |
| The Effects of Epsilon Amino-Caproic Acid upon Potassium Metabolism in the Dog..... | H. J. Carroll and D. A. Tice | 449 |
| Citrate Metabolism in Diabetes | | |
| I. Plasma Citrate in Alloxan-Diabetic Rats and in Clinical Diabetes | D. C. DeVilliers, Jr., P. K. Dixit and A. Lazarow | 458 |
| An in Vitro Method for Studying Insulin Secretion in the Perfused Isolated Rat Pancreas | K. E. Sussman, G. D. Vaughan and R. F. Timmer | 466 |
| News and Notes | | 477 |
| Book Reviews | | 477 |

No. 6 (June)

| | | |
|---|---|-----|
| Preliminary Report | | |
| Plasma Levels of Aromatic Amines in Renal Failure | R. E. Morgan and J. M. Morgan | 479 |
| Demonstration of Distal Tubular Flux of Phosphorus Using Modified Stop-Flow Analysis..... | B. B. Davis, L. H. Kedes and J. B. Field | 482 |
| Early Latent Diabetes—New Concept | G. Shochat, J. Kessler and D. L. Wilansky | 492 |
| Exchangeable Potassium in Diabetics..... | N. Telfer | 502 |
| Effect of Trivalent Chromium on Glucose Tolerance | W. H. Glinsmann and W. Mertz | 510 |
| Myositis Ossificans Progressiva | | |
| D. M. Smith, W. Zeman, C. C. Johnston, Jr. and W. P. Deiss, Jr. | | 521 |

| | | |
|---|---|-----|
| Some Problems of the Penicillamine Action in Hepatolenticular Degeneration..... | <i>K. Chromy and A. Heyrovsky</i> | 529 |
| Pheochromocytoma, Neurofibromatosis and Thyroid Carcinoma | | |
| <i>R. D. Ruppert, L. F. Buerger and W. W. L. Chang</i> | | 537 |
| Mechanism of Heparin Inhibition of Adrenal Steroid A Ring Reduction | | |
| <i>R. C. Troop, P. T. Krzanowski and J. T. Biggs, Jr.</i> | | 542 |
| Effect of Lysine and Tryptophan Supplementation on Nicotinic Acid Metabolism in Pigs Given Raw or Lime-Treated Corn Diets | | |
| <i>J. E. Braham, R. Bressani and M. A. Guzmán</i> | | 548 |
| Effect of L-Leucine on Glucose Turnover in Dogs..... | <i>S. S. Sanbar</i> | 557 |
| Effects of Novobiocin on Pituitary-Thyroid Axis in the Rat and Its Mechanisms..... | <i>Y. Takemura, T. Yamada and K. Shichijo</i> | 566 |

No. 7 (July)

| | | |
|--|--|-----|
| Preliminary Report | | |
| Insulin Release Induced by Glucagon in Organ Cultures of Fetal Rat Pancreas | | |
| <i>D. Vecchio, A. Luyckx, G. R. Zahnd and A. E. Renold</i> | | 577 |
| The Requirement for Protein, and the Utilization of Protein and Calcium during Pregnancy..... | <i>D. J. Naismith</i> | 582 |
| Plasma Growth Hormone after an Overnight Fast and following Glucose Loading in Healthy and Diabetic Subjects | | |
| <i>W. M. Hunter, B. F. Clarke, and L. J. P. Duncan</i> | | 596 |
| The Influence of Venous Occlusion and Exercise on Serum Magnesium Concentration..... | <i>R. Whang and R. Wagner</i> | 608 |
| Metabolism of Cortisol-4-C ¹⁴ in Patients with Infectious and Collagen Diseases..... | <i>Y. Ichikawa</i> | 613 |
| Se ⁷⁵ -Selenomethionine Incorporation into Human Plasma Proteins and Erythrocytes | | |
| <i>H. K. Awwad, E. J. Potchen, S. J. Adelstein and J. B. Dealy, Jr.</i> | | 626 |
| Enzyme Patterns in Glycogen Storage Disease Type II (Pompe's Disease)..... | <i>G. Mekanik, R. L. Smith and R. M. MacLeod</i> | 641 |
| Effect of Stimulation and Suppression of the Thyroid Gland upon Production of Iodoprotein in Man | | |
| <i>C. H. Brown, J. M. Lowenstein, F. S. Greenspan and J. Mangum</i> | | 649 |
| Effect of Nicotinic Acid on the Serum Lipids of Normal and of Thyroidectomized Dogs..... | <i>F. Grande</i> | 661 |
| News and Notes | | 672 |

No. 8 (August)

| | | |
|---|--|-----|
| Preliminary Reports | | |
| Effect of CPIB Ester on Plasma FFA Levels in Man.. | <i>B. M. Rifkind</i> | 673 |
| Excretion of Tritium-Labeled Pyridoxine by Pyridoxine-Deficient Rats..... | <i>D. A. Vaughan and R. L. Winders</i> | 676 |

| | | |
|--|--|-----|
| Comparison of Effects of Several Drugs on Tissue Uptake of Labeled Thyroxine and Triiodothyronine in the Presence of Rat Plasma in Vitro..... | <i>Y. Takemura, T. Yamada, K. Ozawa and K. Shichijo</i> | 679 |
| Conversion of H ³ -Phytol to Phytanic Acid and Its Incorporation into Plasma Lipid Fractions in Heredopathia Atactica Polyneuritiformis | <i>W. Kahlke and H. Wagener</i> | 687 |
| Effects of Epinephrine and Chemically Related Compounds on Enzymatic Deiodination of Thyroxine, Triiodothyronine, Monoiodotyrosine and Diiodotyrosine in Vitro | <i>I. Kobayashi, T. Yamada and K. Shichijo</i> | 694 |
| Effect of Hypophysectomy, Thyroidectomy, Adrenalectomy and Alloxan Diabetes on Incorporation of Fatty Acids into Esters by the Small Intestine in Vitro..... | <i>A. M. Gelb</i> | 707 |
| Excretion of Labeled Thyroxine in the Presence of Cholesterol-Cholic Acid Supplements..... | <i>A. Girard, S. B. Andrus and D. M. Hegsted</i> | 714 |
| Studies on Hydroxyproline Excretion and Corticosteroid-Induced Dwarfism..... | <i>D. Matiasovic and H. Gershbarg</i> | 720 |
| Lipoprotein Lipase Activity in Human Adipose Tissue. I. | <i>B. Persson, P. Björntorp and B. Hood</i> | 730 |
| Electrolyte-Activated Lipolysis in Vitro | <i>S. J. Bleicher, L. Farber, A. Lewis and M. G. Goldner</i> | 742 |
| Acute Ketotic-Type Diabetic Syndrome in Sand Rats with Special Reference to the Pancreas | <i>E. Miki, A. A. Like, J. S. Soeldner, J. Steinke and G. F. Cahill, Jr.</i> | 749 |
| Fatty Acid Synthesis and Gluconeogenesis in Rats Fed a High Caloric Diet..... | <i>Y. Shigeta, N. Oji, M. Hoshi and M. Kang</i> | 761 |
| Book Reviews | | 767 |
| News and Notes | | 768 |

No. 9 (September)

| | | |
|--|---|-----|
| Preliminary Report | | |
| BSP Retention during Total Fasting..... | <i>M. Verdy</i> | 769 |
| Quantitative Microradiographic Study of Bone Remodeling in Cushing's Syndrome..... | <i>B. L. Riggs, J. Jowsey and P. J. Kelly</i> | 773 |
| Dietary Modifications of Cold-Induced Metabolic Effects | <i>D. A. Vaughan, L. N. Vaughan and H. D. Stull</i> | 781 |
| Carbohydrate-Induced Hypertriglyceridemia and Glucose Utilization in Ischemic Heart Disease..... | <i>P. J. Nestel</i> | 787 |
| Mechanisms Involved in the Reduction of Serum Triglycerides in Man Upon Adding Unsaturated Fats to the Normal Diet.. | <i>H. Engelberg</i> | 796 |
| The Effect of Phenformin Hydrochloride on Serum Cholesterol and Triglyceride Levels of the Stable Adult Diabetic | <i>M. J. Schwartz, S. Mirksy and L. E. Schaefer</i> | 808 |
| Interference of Spironolactone in 17-Hydroxycorticoid and 17-Ketosteroid Determinations..... | <i>P. C. Desper, E. B. Flink and J. E. Jones</i> | 823 |

Studies on the Natriuresis of Fasting

| | | |
|---------------------------------------|---|-----|
| I. Effect of Prefast Intake. | <i>B. J. Stinebaugh and F. X. Schloeder</i> | 828 |
| II. Relationship to Acidosis. | <i>F. X. Schloeder and B. J. Stinebaugh</i> | 838 |

Acetate-1-C¹⁴ Metabolism and the Effect of Acetate on Glucose and Palmitate Metabolism in the Perfused Rat Heart

| | | |
|--|---|-----|
| | <i>A. V. Bethencourt, O. E. Matos and J. C. Shipp</i> | 847 |
|--|---|-----|

Lipid Metabolism in the Fetal and Neonatal Rabbit.

| | | |
|--|-------------------|-----|
| | <i>J. F. Roux</i> | 856 |
|--|-------------------|-----|

No. 10 (October)

Preliminary Report

| | | |
|---|--|-----|
| Distribution of Immunoassayable Glucagon in Gastrointestinal Tissues. | <i>R. H. Unger, H. Ketterer and A. M. Eisentraut</i> | 865 |
|---|--|-----|

The Effect of Ethyl α -P. Chlorophenoxyisobutyrate on Ethanol-Induced Hepatic Steatosis in the Rat.

| | | |
|--|--------------------|-----|
| | <i>D. F. Brown</i> | 868 |
|--|--------------------|-----|

The Effects of Long-Term Acetohexamide Treatment on Pancreatic Islet Cell Function in Maturity-Onset Diabetes

| | | |
|--|---|-----|
| | <i>J. Sheldon, K. W. Taylor and J. Anderson</i> | 874 |
|--|---|-----|

Magnesium Depletion in Normal Man.

| | | |
|--|---------------------------------|-----|
| | <i>M. J. Dunn and M. Walser</i> | 884 |
|--|---------------------------------|-----|

The Effect of Alcohol Withdrawal on Electrolyte and Acid-Base Balance.

| | | |
|--|---|-----|
| | <i>G. Sereny, A. Rapoport and H. Husdan</i> | 896 |
|--|---|-----|

Effects of Sodium Fluoride on the Clinical Course and Metabolic Balance of an Infant with Osteogenesis Imperfecta Congenita

| | | |
|--|--|-----|
| | <i>M. I. Aeschlimann, J. A. Grunt and J. F. Crigler, Jr.</i> | 905 |
|--|--|-----|

Dietary Methionine and Its Influence on Cystine Excretion in Cystinuric Patients.

| | | |
|--|---------------------------------------|-----|
| | <i>H. H. Zinneman and J. E. Jones</i> | 915 |
|--|---------------------------------------|-----|

The Influence of Cortisol on Glucose Utilization in Sheep

| | | |
|--|--|-----|
| | <i>J. M. Bassett, S. C. Mills and R. L. Reid</i> | 922 |
|--|--|-----|

Short-Term Effects of Ovine Growth Hormone on Plasma Glucose, Free Fatty Acids and Ketones in Sheep

| | | |
|--|---|-----|
| | <i>J. M. Bassett and A. L. C. Wallace</i> | 933 |
|--|---|-----|

Myocardial Uptake and Fractional Distribution of Palmitate-1-C¹⁴ by the Ischemic Dog Heart.

| | | |
|--|------------------------------------|-----|
| | <i>J. Scheuer and N. Brachfeld</i> | 945 |
|--|------------------------------------|-----|

Book Review

| | | |
|--|--|-----|
| | | 955 |
|--|--|-----|

News and Notes

| | | |

Index of Subjects

- Acetate metabolism, by heart, 847-855
 Acetohexamide in diabetes, long-term effects of, 874-882
 Acid-base balance
 alcohol withdrawal affecting, 896-904
 in arterial blood and ascitic fluid, 414-419
 Acid excretion by kidney, posture affecting, 76-87
 Acidification, urinary, during fasting, 17-24
 Acidosis
 bone response to, 236-240
 and natriuresis of fasting, 838-845
 treatment of, 1011-1019
 Acromegaly, pituitary irradiation in, 290-302
 ACTH
 dexamethasone affecting response to, 304-308
 hirsute women responding to, 364-369
 Actinomycin D, and gluconeogenesis, 232-234
 Adipose tissue. *See* Obesity
 Adrenal gland
 function studies
 in hirsutism, 364-369
 after pituitary irradiation in acromegaly, 295-297, 298
 insufficiency
 and postural changes in urine flow, 58
 water and electrolyte metabolism in, 992-1001
 pheochromocytoma with neurofibromatosis and thyroid carcinoma, 537-541
 steroid hormones. *See* Corticosteroids
 Adrenalectomy
 affecting intestinal incorporation of FA, 707-713
 creatinine excretion after, 350
 and renal excretion of acid, 76-86
 and response to 2-deoxyglucose, 223
 Alcohol
 affecting urine flow in posture changes, 56
 effects in liver, CIPB affecting, 868-873
 and hypoglycemia, 1020-1023
 withdrawal of, effects of, 896-904
 Aldomet, affecting deiodination of thyroid hormones, 694-705
 Aldosterone
 affecting postural changes in renal excretion, 53-63
 heparin affecting metabolism of, 542-547
 and sodium balance in adrenocortical insufficiency, 992-1001
 Alotec, affecting deiodination of thyroid hormones, 694-705
 Amines, aromatic, levels in renal failure, 479-481
 Amino acids
 metabolism in Hurler's syndrome, 429-435
 urinary, in psoriasis, 46-52
 withdrawn from lime-treated corn diet, 548-555
 Aminolevulinic acid, in bile fistula dogs, and early appearance of bilirubin, 1129-1139
 Amphetamine, affecting urine flow in posture changes, 55-56
 Amylo-1, 6-glucosidase activity, in Pompe's disease, 641-647
 Antidiuretic hormone
 activity in alcohol withdrawal, 896-904
 affecting postural changes in renal excretion, 53-63
 Aromatic amine levels, in renal failure, 479-481
 Arterial blood, acid-base equilibria in, 414-419
 Arteriosclerosis, and plasma NEFA response

- to glucose load, 65–69
- Arteriovenous differences in electrolytes, in paralysis, 138–143
- Ascitic fluid, acid-base equilibria in, 414–419
- Asthpul, affecting deiodination of thyroid hormones, 694–705
- Atromid
 - affecting plasma FFA levels, 673–675
 - in ethanol-induced hepatic steatosis, 868–873
- Benzothiadiazines
 - affecting catecholamines, 257–261
 - affecting glucose uptake, 88–93
- Bicarbonate sodium, in metabolic acidosis, 1011–1019
- Bile acid metabolism, hormones affecting, 181–188
- Bile fistula dogs, studies with, 1120–1138
- Bilirubin
 - early appearance after aminolevulinic acid in bile fistula dogs, 1129–1139
 - protoporphyrin converted to, in dogs, 1120–1127
- Bioassays for insulin-like activity in sera, 70–75
- Blood, arterial, acid-base equilibria in, 414–419
- Blood volume
 - in alcohol withdrawal, 896–904
 - in fasting, 409–413
- Bone
 - estimation of formation rate, 436–443
 - in hyperparathyroidism, 1084–1091
 - osteogenesis imperfecta congenita, 905–913
 - remodeling in Cushing's syndrome, 773–779
 - response to metabolic acidosis, 236–240
- Book reviews
 - Anticoagulant Prophylaxis and Treatment (*Ingram & Richardson*), 478
 - The Cells of Uterine Adenocarcinoma (*Reagan & Ng*), 94
 - Experimental Physiology (*Andrews*), 767
 - Fibrinolysis (*Fearnley*), 767
 - Outline of Endocrine Gland Syndromes (*Danowski*), 286
 - The Parathyroid Gland (*Gaillard et al., eds.*), 189
 - Physiology of Puberty (*Bosch & Donovan*), 955
 - Steroid-Spektrenatlas (*Neudert et al.*), 477
- Bromophenol blue, affecting tissue uptake of thyroid hormones, 679–685
- Bromsulphthalein retention, in fasting, 769–772
- Caffeine, affecting glucose metabolism by adipose tissue, 30–37
- Calcium
 - diurnal variations in excretion of, 1002–1009
 - excretion in acidosis, 236–240
 - lipolytic effect of, 742–748
 - and magnesium balance, 884–895
 - utilization in pregnancy, 582–595
- Cancer. *See* Tumors
- Carbohydrate metabolism. *See* Glucose
- Carbon dioxide respiration, in fasting, 394–399
- Catecholamines
 - diazoxide affecting, 257–261
 - thyroid hormone interaction with, 694–705
- Cellular potassium and sodium, of muscle in paralysis, 153–161
- Ceruloplasmin turnover, in Wilson's disease, 1029–1033
- Chloride, arteriovenous difference in paralysis, 141
- Chlorophenoxyisobutyrate (CPIB)
 - affecting plasma FFA levels, 673–675
 - in ethanol-induced hepatic steatosis, 868–873
- Chloroquine diphosphate, affecting tissue uptake of thyroid hormones, 679–685
- Chlorothiazide, affecting glucose uptake, 88–93
- Cholesterol
 - dietary, with cholic acid, 714–719
 - levels of
 - dietary changes affecting, 379–381
 - in fetal and neonatal rabbit, 856–863
 - hypercholesterolemia after diversion of pancreatic venous drainage into vena cava, 1059–1067
 - in lean fasting subjects, 401–408
 - in liver, in CPIB-treated alcohol-fed rats, 868–873
 - nicotinic acid affecting, in hypothyroid dogs, 661–671
 - phenformin affecting, 808–821
 - plasma levels in myxedema, thyroxin affecting, 123–133
- Cholic acid-cholesterol supplements in diet, 714–719

- Chromium, trivalent, affecting glucose tolerance, 510-520
- Citrate metabolism, in diabetes, 458-465
- Cold, prolonged, with starvation period, 9-15
- Cold-induced metabolic effects, diet affecting, 781-785
- Collagen diseases, cortisol metabolism in, 613-625
- Conference on energy metabolism and body fuel utilization, 94
- Copper
 penicillamine affecting levels of, 529-535
 in saliva, in Wilson's disease, 1050-1053
- Corn diets, lime-treated, 548-555
- Corticosteroids
 in adrenal insufficiency, and electrolyte metabolism, 992-1000
 dwarfism from, 720-729
 heparin affecting metabolism of, 542-547
 in plasma, and response to ACTH, 304-308
- Cortisol
 excretion rates, 359-362
 and glucose utilization, 922-931
 metabolism in infectious and collagen diseases, 613-625
- Cortisone
 excretion rates, 359-362
 and FFA levels in early latent diabetes, 492-501
 heparin affecting metabolism of, 542-547
- Creatine phosphokinase levels, in thyroid therapy for muscular dystrophy, 971-979
- Creatinine
 clearance of, and response to parathyroid extract, 210-211
 excretion of
 after adrenalectomy, 350
 in lean fasting subjects, 401-408
 postural changes affecting, 53-63
- Cryohypophysectomy, stereotactic, in acromegaly, 301
- Cushing's syndrome, bone remodeling in, 773-779
- Cystinuria, dietary methionine in, 915-921
- o,p'*-DDD, in interstitial-cell tumor of testis, 242-254
- 2-Deoxyglucose, gluconeogenesis after, 222-229, 230-234
 and insulin release, 1068-1075
- Deoxyribonucleic acid
 in adipose tissue, during starvation and re-feeding, 1098-1103
 affecting glucose metabolism by adipose tissue, 30-37
- Desoxypyridoxine, antagonistic effect of, 676-678
- Dexamethasone, and response to ACTH, 304-308
- Diabetes
 acetohehexamide in, long-term effects of, 874-882
 alloxan, affecting, intestinal incorporation of FA, 707-713
 citrate metabolism in, 458-465
 early latent, 492-501
 exchangeable potassium in, 502-509
 fasting affecting glucose tolerance in, 98-102
 hyperlipidemia after diversion of pancreatic venous drainage into vena cava, 1059-1067
 induced by diet, in sand rats, 749-759
 insipidus, and postural changes in urine volume, 59-60
 insulin affecting glucose and FFA transfer rates, 262-269
 insulin release by glucagon, 577-581, 1046-1049
 lipomatrophic, 309-323
 overweight and triglyceride levels in, 135-137
 phenformin hydrochloride in, 808-821
 plasma growth hormone in, 596-607
 and plasma NEFA response to glucose load, 65-69
 tolbutamide in, 957-969
 See also Glucose; Insulin
- Diazoxide
 affecting catecholamines, 257-261
 affecting glucose uptake, 88-93
- Diet
 affecting plasma lipids in myxedema, 123-133
 affecting triglyceride levels, 796-804
 cholesterol-cholic acid supplements, 714-719
 and cold-induced metabolic effects, 781-785
 feeding patterns affecting fat deposition, 173-180
 high caloric, and gluconeogenesis, 761-765
 inducing diabetes in sand rats, 749-759
 lime-treated corn diets, 548-555

- magnesium deficiency, 884-896
- methionine intake in cystinuria, 915-921
- and plasma lipid levels, 379-381
- protein in sucrose diets, 1034-1037
- requirements in pregnancy, 582-595
- vitamin C and protein relationships, 1039-1045
- See also* Starvation
- Dinitrophenol, affecting tissue uptake of thyroid hormones, 679-685
- Diuretics, mercurial, affecting stop-flow pattern, 1081
- Diurnal rhythm, affecting acid excretion by kidney, 76-87
- Dwarfism, from corticosteroids, 720-729
- Edema, idiopathic, and postural changes in renal excretion, 53-63
- Effortil, affecting deiodination of thyroid hormones, 694-705
- Electrolytes
 - activating lipolysis, 742-748
 - in adrenal insufficiency, 992-1000
 - in alcohol withdrawal, 896-904
 - in fasting, 401-408
 - in paralysis, arteriovenous differences in, 138-143
 - in periodic paralysis, 145-151, 153-161
 - regulation of, renal mechanisms for, 338-357
- Enzyme patterns in Pompe's disease, 641-647
- Ephedrine, affecting deiodination of thyroid hormones, 694-705
- Epinephrine, interaction with thyroid hormones, 694-705
- Epsilon amino-caproic acid, affecting potassium metabolism, 449-457
- Erythrocytes
 - in magnesium depletion, 889-890
 - selenomethionine incorporation into, 626-639
- Erythropoiesis, in bile fistula dogs, 1129-1138
- Ethanol. *See* Alcohol
- Ethionine, and gluconeogenesis, 232-233
- Exercise and venous occlusion, and serum magnesium levels, 608-611
- Extravascular-extracellular fluid, composition of, 414-419
- Fasting. *See* Starvation
- Fat
 - deposition of, feeding patterns affecting, 173-180

Notes to Contributors

Original Communications. Manuscripts for publication, letters and all other editorial communications should be addressed to the Editor-in-Chief, at the address given on page iv. Articles are accepted for publication on the condition that they are contributed solely to this Journal. Contributors should bear in mind the nature of the Journal, i.e., articles should have a definite metabolic application, with case reports submitted only if they include controlled observations of an exceptionally revealing nature. Papers should be as brief as possible, consistent with the subject.

The original copy and one duplicate should be submitted (table and figures also to be submitted, if possible, in duplicate). Contributions should include a page giving the authors' degrees and hospital and academic affiliations and an address for mailing proofs.

Preliminary Reports. Contributors are encouraged to submit articles in a special short form to be known as a "Preliminary Report," with the understanding that if such an article is accepted it will be printed in the next available issue, regardless of the backlog of regular articles. A "Preliminary Report" can serve as a preliminary report on work just completed, or may be a final report or an observation which does not require a lengthy write-up. To qualify for the priority given a Preliminary Report the article must not exceed 1000 words including the bibliography and can have no more than one simple table or small figure. If a figure or table is included the author should cut the 1000 words allowance by an amount sufficient to allow for the space which will be taken up by the table or figure, as no Preliminary Report may take up more than two pages in the Journal. Despite the limitations on length, data to support the conclusions stated should be included to the extent necessary.

Manuscripts should be typewritten on good quality paper, one side of the page only, with double or triple spacing and

liberal margins throughout. Handwritten manuscripts, single-spaced material, and excessive interlineated corrections are unacceptable. References to the literature should follow the style of the Journal and be compiled at the end of the article in numerical sequence.

Illustrations and Tables. Position of figures and tables in the text should be marked on manuscript. METABOLISM uses arabic rather than roman numbering. Figures should carry their number and the author's name on the back; figure legends should be compiled in a separate list. To ensure clear reproduction, all copy for zinc cuts, including pen drawings and charts, should be prepared with black india ink, and a black ribbon should be used for typewritten material; for half-tone work, good photographic prints or the original drawings should be supplied. Graphs should be drawn on plain white or blue-lined graph paper. Tables and illustrations should be of a size easily handled, and for all illustrations the effect of possible reduction in size to fit the Journal page should be considered.

Four illustrations and a total of one and one-half printed pages of tables are allowed gratis per article, with the contributor bearing the cost in excess of these limits; excessive engravings are charged for at \$10.00 each, excessive tables at about \$20.00 per page. The contributor must likewise bear all costs connected with printing color plates.

Proofreading. Contributors are provided with galley proofs and are asked to proofread them for typesetting errors. Important changes in data are allowed within reason without cost, but excessive alterations and additions must be charged to the contributor.

Reprints. Reprints of articles will be furnished to contributors when ordered in advance of publication. An order form, showing cost of reprints, is sent with proofs. Individual reprints of an article can usually be obtained by writing directly to its author (see footnote on first page).
